

SENSEN

LICENCE PLATE RECOGNITION

- Vehicle-mounted camera software application that detects when vehicles have overstayed, alerts parking officer to the overstay and provides them with evidential data for enforcement purposes
- Captures high volumes of accurate parking occupancy data essential for effective traffic engineering management
- Evidence gathered is legal and admissible in Australian courts
- Extremely high read rates in the industry
- PEMS back-end management system that includes all necessary reporting and data management functionality for parking enforcement
- Integrates with handheld enforcement technology to provide real-time parking occupancy and enforcement management to officers in the field
- Two and four camera configurations
- Over 10 years of global licence plate recognition experience
