

MANAGEMENT AND REPORTING

Duncan's Parking Enterprise Management System (PEMS) is the industry benchmark, delivering cities an integrated parking platform supporting the following capability:

- Real-time data feeds to and from:
 - Infringement issuance technology
 - Parking meters, Pay by Phone services
 - Sensors
 - Licence plate recognition technology
 - Parking guidance applications and signage
 - Field service management solutions
- Real-time operational and financial dashboards
- Rich business intelligence reporting for all aspects of parking operations:
 - Financial audit and reconciliation
 - Financial and operational performance
 - Equipment performance
 - People performance
- Managed solution using geographically redundant Tier 3 data centres and high availability infrastructure. PCI DSS certified.
